 - » Operator and Train the Trainer
 - » Class I, IV, and V Sit-Down Counterbalance
 - » Class II and III Warehouse Products
 - » Class VII Rough Terrain – Telehandler

SCAN ME

WHY DO WE TRAIN?

SAFETY – The number one reason to train is prevention of fatalities, serious injuries, and recordable incidents. Operating in an unsafe manner paves the way to physical, emotional, and financial hardships. We train to build safe work environments.

COMPLIANCE – Per OSHA’s 1910.178 federal regulation, all operators of a powered industrial truck must be trained prior to operating. Per ANSI A92.24, all operators of mobile elevated work platforms shall receive operator training and all supervisors of mobile elevated work platform operators shall receive supervisor training. We train to assure those using MEWP’s and PIT’s have a full understanding of all rules and regulations associated with the equipment.

EFFICIENCY – The leading service call for MEWP’s is operator error. Time is money and operators who cannot operate equipment in an efficient manner are a safety hazard and add costly downtime to projects. We train to produce efficient operators with an understanding of how to utilize these machines to the highest productivity level and reduce costly downtime.

Prices valid through September 30, 2023.

All products are subject to availability. We reserve the right to correct pricing and printing errors.
